

App. No. 10/065,749

EX PARTE INTERVIEW

Applicant requests an interview with the Examiner to discuss any potential questions or issue that the Examiner may have prior to the next Office Action.

REMARKS – General

Trademarks have been removed from the Specifications or modified.

The Claims have been modified to address the Examiner's Section 101 and Section 112 rejections.

The new base independent claim has the following "a software development workstation with internal local cache memory and a network interface that interfaces the workstation to a number of other workstations, external storage". This points out that the process uses a workstation that is connected to other workstations.

This component of the invention is unique to the Application/s invention and is not in Hughes (USPUB 2003/0192029) or in Harmon (USPUB 2003/0041313) and the Applicant respectfully argues makes the new Claims novel and not obvious to someone skilled in the art and therefore allowable.

Conclusion

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

Respectfully submitted,

Jeffrey M. Furr, Esq.
